# Canterbury Arbor Assembly Manual

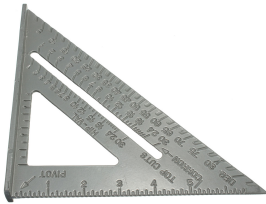

Thank you for your purchase of this arbor.

This manual is designed to simplify the assembly process. Please read through the entire manual before starting!

Take a deep breath and get at it; the satisfaction and enjoyment of this arbor is only a few minutes away. Have fun!

You have purchased a product that consists of bulky pieces. With your purchase, you assume full responsibility to have the necessary manpower available to assemble the product. You also agree that any damage that happens to the product during the entire construction process is your responsibility, and neither the seller, nor the manufacturer, will be held liable for any such damage.

Square

Hammer

25' Tape  
Measure

Cordless  
Drill

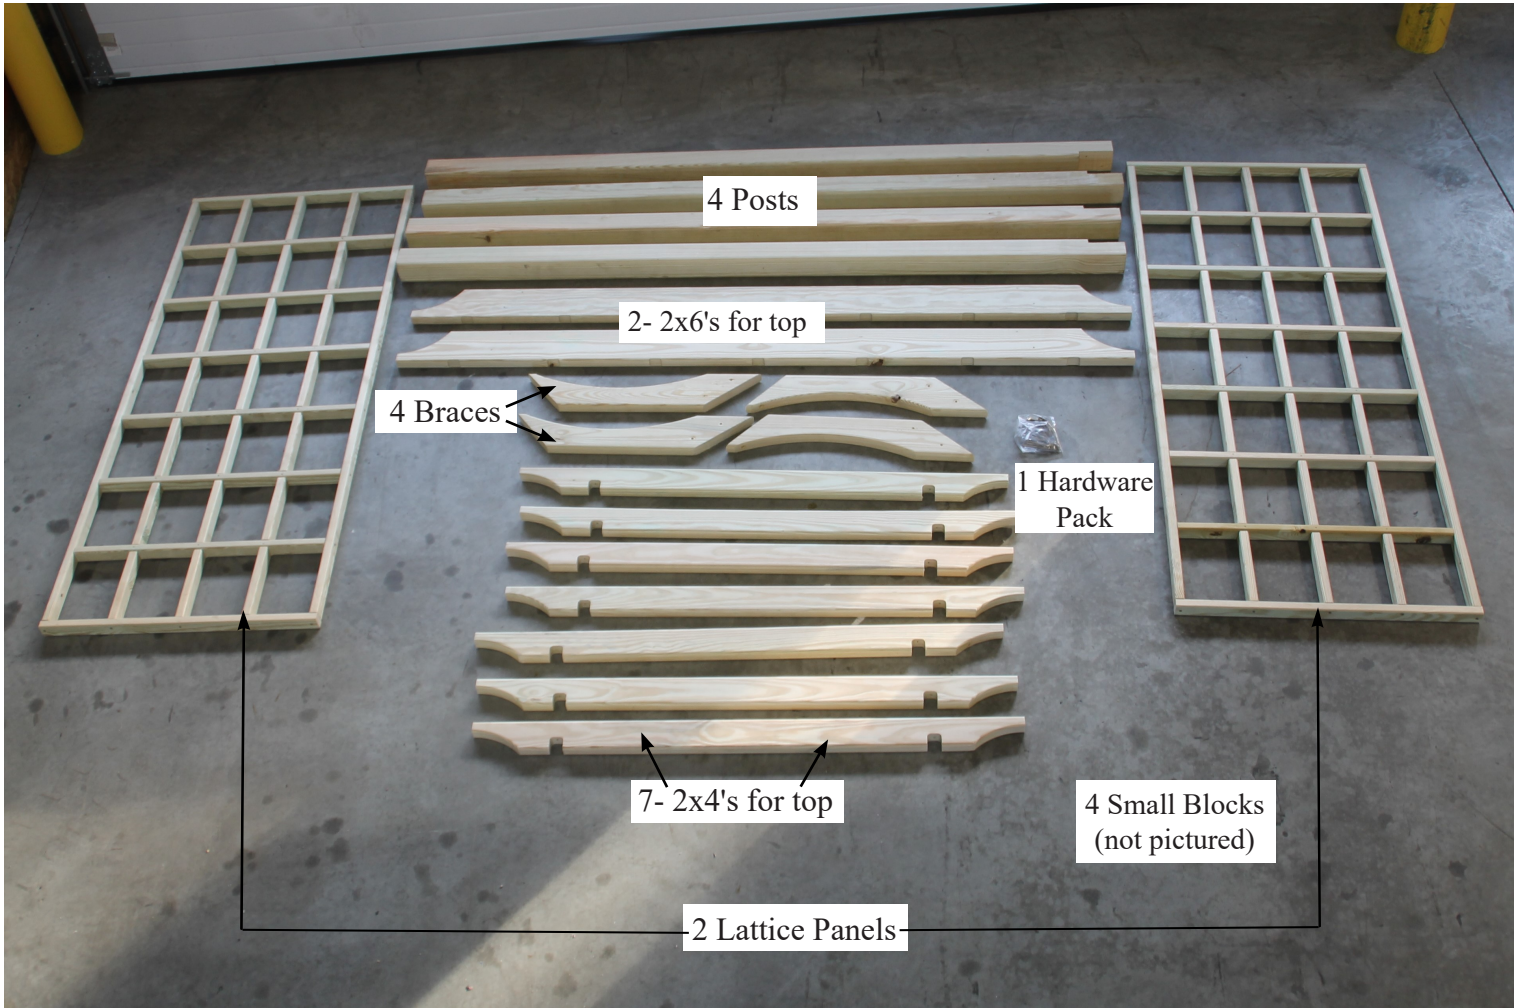

#2 Square  
Drive Tip  
(included)

Star Drive Tip  
(included)

# Parts List

Step:1

Position lattice panel between posts with notched part of post facing out. Place small blocks under each corner of lattice.

Step:2

Fasten lattice to posts using 2" screws. Use pre-drilled holes in lattice. Measure from the bottom of the post 10".

Step:3

Your first completed arbor side should look like this. Repeat step two for second arbor side.

Step:4

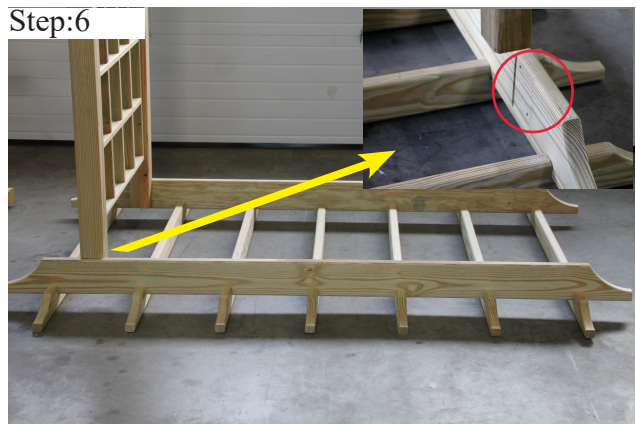

Assemble arbor top. Position 2x6's on edge with notches facing up. Fit notches on 2x4 into the notches on the 2x6, then fasten with 3" screws provided.

Step:5

The completed arbor top should look like this.

Step:6

Turn arbor top upside down. Then fit together the notch on the top of the post of a completed arbor side and the notch on the arbor top (circled in red). Repeat step on opposite side.

Step:7

Use square to properly align post. Fasten 2x6 to post using lag screws provided. Repeat this step at each post.

Step:8

Fasten a brace to each post. This stabilizes the arbor. Continue using a square on this step. Fasten the brace to the post first.

Step:9

Fasten the brace to the arbor top at each corner.

Step:10

Congratulations! Your arbor is now complete.

Step:11

Position arbor at desired location. Then anchor each post to the ground using 4 anchors provided.
